

6. ENHANCED STATION

JEWELL STATION

NEW URBAN VILLAGE

Grand Staircase

Integrated Seating

Improved Circulation

The proposal celebrates the location on the historic Upfield rail line with the station as the key focus of the masterplan. The existing heritage station building is to be refurbished and returned to its former grandeur.

A number of initiatives proposed will help provide a better experience for users of the station and visitors to the precinct.

- A new grand staircase leading from Wilson Ave to the station
- Redesigned circulation space to better manage bikes and pedestrians
- Space provided for passive and programmed activation
- New apartment buildings overlooking the station platforms, providing passive surveillance and increased security

- Generous bike parking throughout the precinct
- Extensive integrated seating in the new public realm
- New lighting installed to both sides of the station for way finding and security
- Public and community focused art opportunities provided
